

Q Why will there be coverage for potentially abortion-inducing, cancer-causing contraception in my healthcare plan?

A **Because Obamacare gave the Department of Health and Human Services the authority to label pregnancy as a “preventable disease,” treatments of these “diseases” must be covered at 100% in all insurance plans nationwide starting Jan 1, 2014. These drugs are considered ways to “prevent the disease” of pregnancy.**

Q If I give money to a charity like Mother Teresa’s order of nuns, a Christian College, or a Catholic foodbank, will my donation be used to fund abortion coverage in their employee health care plans?

A **Probably yes, unless that organization has refused to comply and pays massive fees or dropped their employee health insurance plans.**

Q Even if I find a health insurance plan with no abortion coverage, will my tax dollars be used to give subsidies to those who normally couldn’t purchase health care and chooses abortion in their plan?

A **Yes.**
